Important — please read first

The doctor decides — always. This report only suggests times inside the delivery window that your doctor has already approved. The date, time and method of a delivery must be decided by the doctor on medical grounds alone. The health and safety of the mother and the baby come before any muhurat.

Please do not ask or pressure your doctor or hospital to deliver earlier, later or at a particular hour for astrological reasons. If the doctor advises a different time — or an emergency arises — follow the medical advice immediately. A child born at any time is a blessing.

No guarantee. Every care has been taken to calculate the planetary positions and periods in this report accurately. Even so, astrology is a traditional system of interpretation, and its rules differ between traditions, regions and families. This report is provided "as is", without any guarantee or warranty of any kind, express or implied, about its accuracy, completeness or fitness for any purpose. Kya Bole Taare accepts no responsibility for any decision taken on its basis.

Please consult your own astrologer (family pandit or jyotishi) before finalising any muhurat.

How to read this report

Every 10 minutes inside the hospital hours was checked. Each moment gets a score out of 100 from the factors below; moments of the same quality are joined into one window. The time that counts in astrology is the baby's **first breath**, not the start of the operation — so prefer **long windows** that give the surgical team time.

Grades: **75–100 Excellent** · **60–74 Good** · **45–59 Acceptable** · **below 45 Avoid**.

North Indian practice gives more weight to the lagna, avoids bhadra (Vishti karana) and gand-mool nakshatras very strictly, and values Abhijit muhurta.

Factor	Points	Why it matters
Nakshatra	25	The baby's birth star sets the mind, the first dasha and the name letter. Fixed, soft and swift stars are preferred; fierce and sharp stars are avoided.
Lagna	25	The rising sign is the body and health of the child. Benefics in kendra/trikona and an empty 8th house help; malefics in the 1st or 8th, the Chandra in 6/8/12 and lagna gandanta harm.
Tithi	15	Amavasya and the rikta tithis (Chaturthi, Navami, Chaturdashi) are avoided; Ashtami is mixed.
Yoga	10	Vyatipata and Vaidhriti are the most inauspicious yogas; a few others are also avoided.
Karana	10	Vishti karana (bhadra) is avoided for auspicious beginnings.
Day periods	10	Rahu kaal, yamaganda and gulika are avoided; the midday Abhijit muhurta is valued.
Weekday	5	Days of benefic planets (Monday, Wednesday, Thursday, Friday) are preferred.

Notes for the family

- Share the 2–3 best windows with your doctor **only as a preference**, and accept the doctor's decision without argument.
- Prefer long windows; a surgery cannot start to the minute. The birth time is the first breath of the baby — ask the hospital to record it exactly.
- If the birth happens in a gand-mool nakshatra (Ashwini, Ashlesha, Magha, Jyeshtha, Mula, Revati), many families perform gand-mool shanti later — ask your pandit.
- Keep the hospital's record of the exact birth time; you will need it for the baby's kundli, naming and every future muhurat.
- Consult your own astrologer before finalising, especially if your family follows a regional custom not covered here.

A gift for your baby
